| Preliminary assessment of wetland condition at various scales                                            | X         | X            | X   | X    | X            |                 |
| Classification of wetland types                                                                         |           |              |     |      | X            |                 |
| Identifying reference domains                                                                          | X         | X            | X   |      | X            |                 |
| Prioritizing monitoring efforts                                                                         | X         | X            | X   | X    | X            | X               |
| Identification of reference standard sites                                                               | X         | X            | X   |      |              |                 |
| Identification of rare/unique sites                                                                     | X         | X            |     |      | X            | X               |
| Identify restoration opportunities and constraints                                                       | X         | X            | X   | X    | X            | X               |
| Cumulative impact assessment at a watershed scale                                                        | X         | X            | X   | X    | X            | X               |
| Tool for local planning                                                                                 | X         | X            | X   | X    | X            | X               |
| Develop landscape profiles of wetland resources                                                          | X         |              |     |      |              | X               |
